Platform Evaluation Notes

(Wix vs WordPress vs Blogger)

1. Evaluation Summary

Three platforms were evaluated for hosting the Aidivehub learning blog:

- **Wix** – visual drag-and-drop builder
- **WordPress** – highly customizable CMS
- **Blogger** – free Google-hosted blogging platform

Final Selection: Blogger, due to **free SSL**, zero hosting cost, simplicity, and alignment with current project needs.

2. Detailed Comparison Table

Platform	Strengths	Limitations	Suitability
Wix	Easy drag-and-drop builder, beautiful templates, fast setup	Free plan shows ads, limited SEO control, no free SSL for custom domains, not ideal for long-term blogging	Good for small personal sites, not ideal for scalable learning blog
WordPress.org	Full customization, plugins, themes, SEO power, scalable	Requires hosting, SSL, setup time, maintenance	Best for long-term professional sites, but requires budget
Blogger	Free SSL, free hosting, Google ecosystem, simple UI, fast, stable	Limited customization, no plugin ecosystem, basic SEO tools	Best for cost-free learning documentation and early-stage blogging

3. Evaluation Criteria & Findings

A. Cost

- **Wix:** Free plan limited; premium required for custom domain
- **WordPress:** Hosting + SSL + domain = recurring cost
- **Blogger: Completely free**, including SSL

Winner: Blogger

B. Security

- **Wix:** SSL only on paid plans
- **WordPress:** SSL depends on hosting provider
- **Blogger: Free SSL automatically enabled**

Winner: Blogger

C. Customization

- **Wix:** Good visual design, limited backend control
- **WordPress:** Unlimited customization (themes, plugins, code)
- **Blogger:** Limited but sufficient for learning blog

Winner: WordPress

D. SEO

- **Wix:** Basic SEO
- **WordPress:** Best SEO tools (Yoast, RankMath)
- **Blogger:** Basic SEO but integrates with Google Search Console

Winner: WordPress

E. Ease of Use

- **Wix:** Easiest for beginners
- **WordPress:** Steeper learning curve
- **Blogger:** Very simple, minimal setup

Winner: Wix / Blogger (tie)

F. Long-Term Scalability

- **Wix:** Limited
- **WordPress:** Highly scalable
- **Blogger:** Moderate; good for early stages

Winner: WordPress

4. Final Decision Rationale: Why Blogger Was Selected

Blogger was chosen because it meets the **core requirements** of the Aidivehub project:

- **Zero cost** (hosting + SSL + platform)
- **Free SSL** (critical for security & SEO)
- **Fast setup** for daily learning documentation
- **Google ecosystem integration** (Analytics, Search Console)
- **Simple UI** suitable for quick publishing
- **Low maintenance** (no updates, no plugins to manage)

This aligns with the project's early-stage goal: **Document learning consistently without overhead or cost.**
